Import a private key in Anchor

Guide for Anchor on iOS

Version: 1.2.3

Step 1 - Add Account

As an alternate method of recovery, Anchor allows to import account details from an account created outside ofAnchor.

This process differs from "Account Recovery" as it does not use the Owner Key Certificate, but it does require existing access to the account to view the Private Key

To begin the account import process, select "Add Account"

No SIM   3:42 PM

Welcome to Anchor
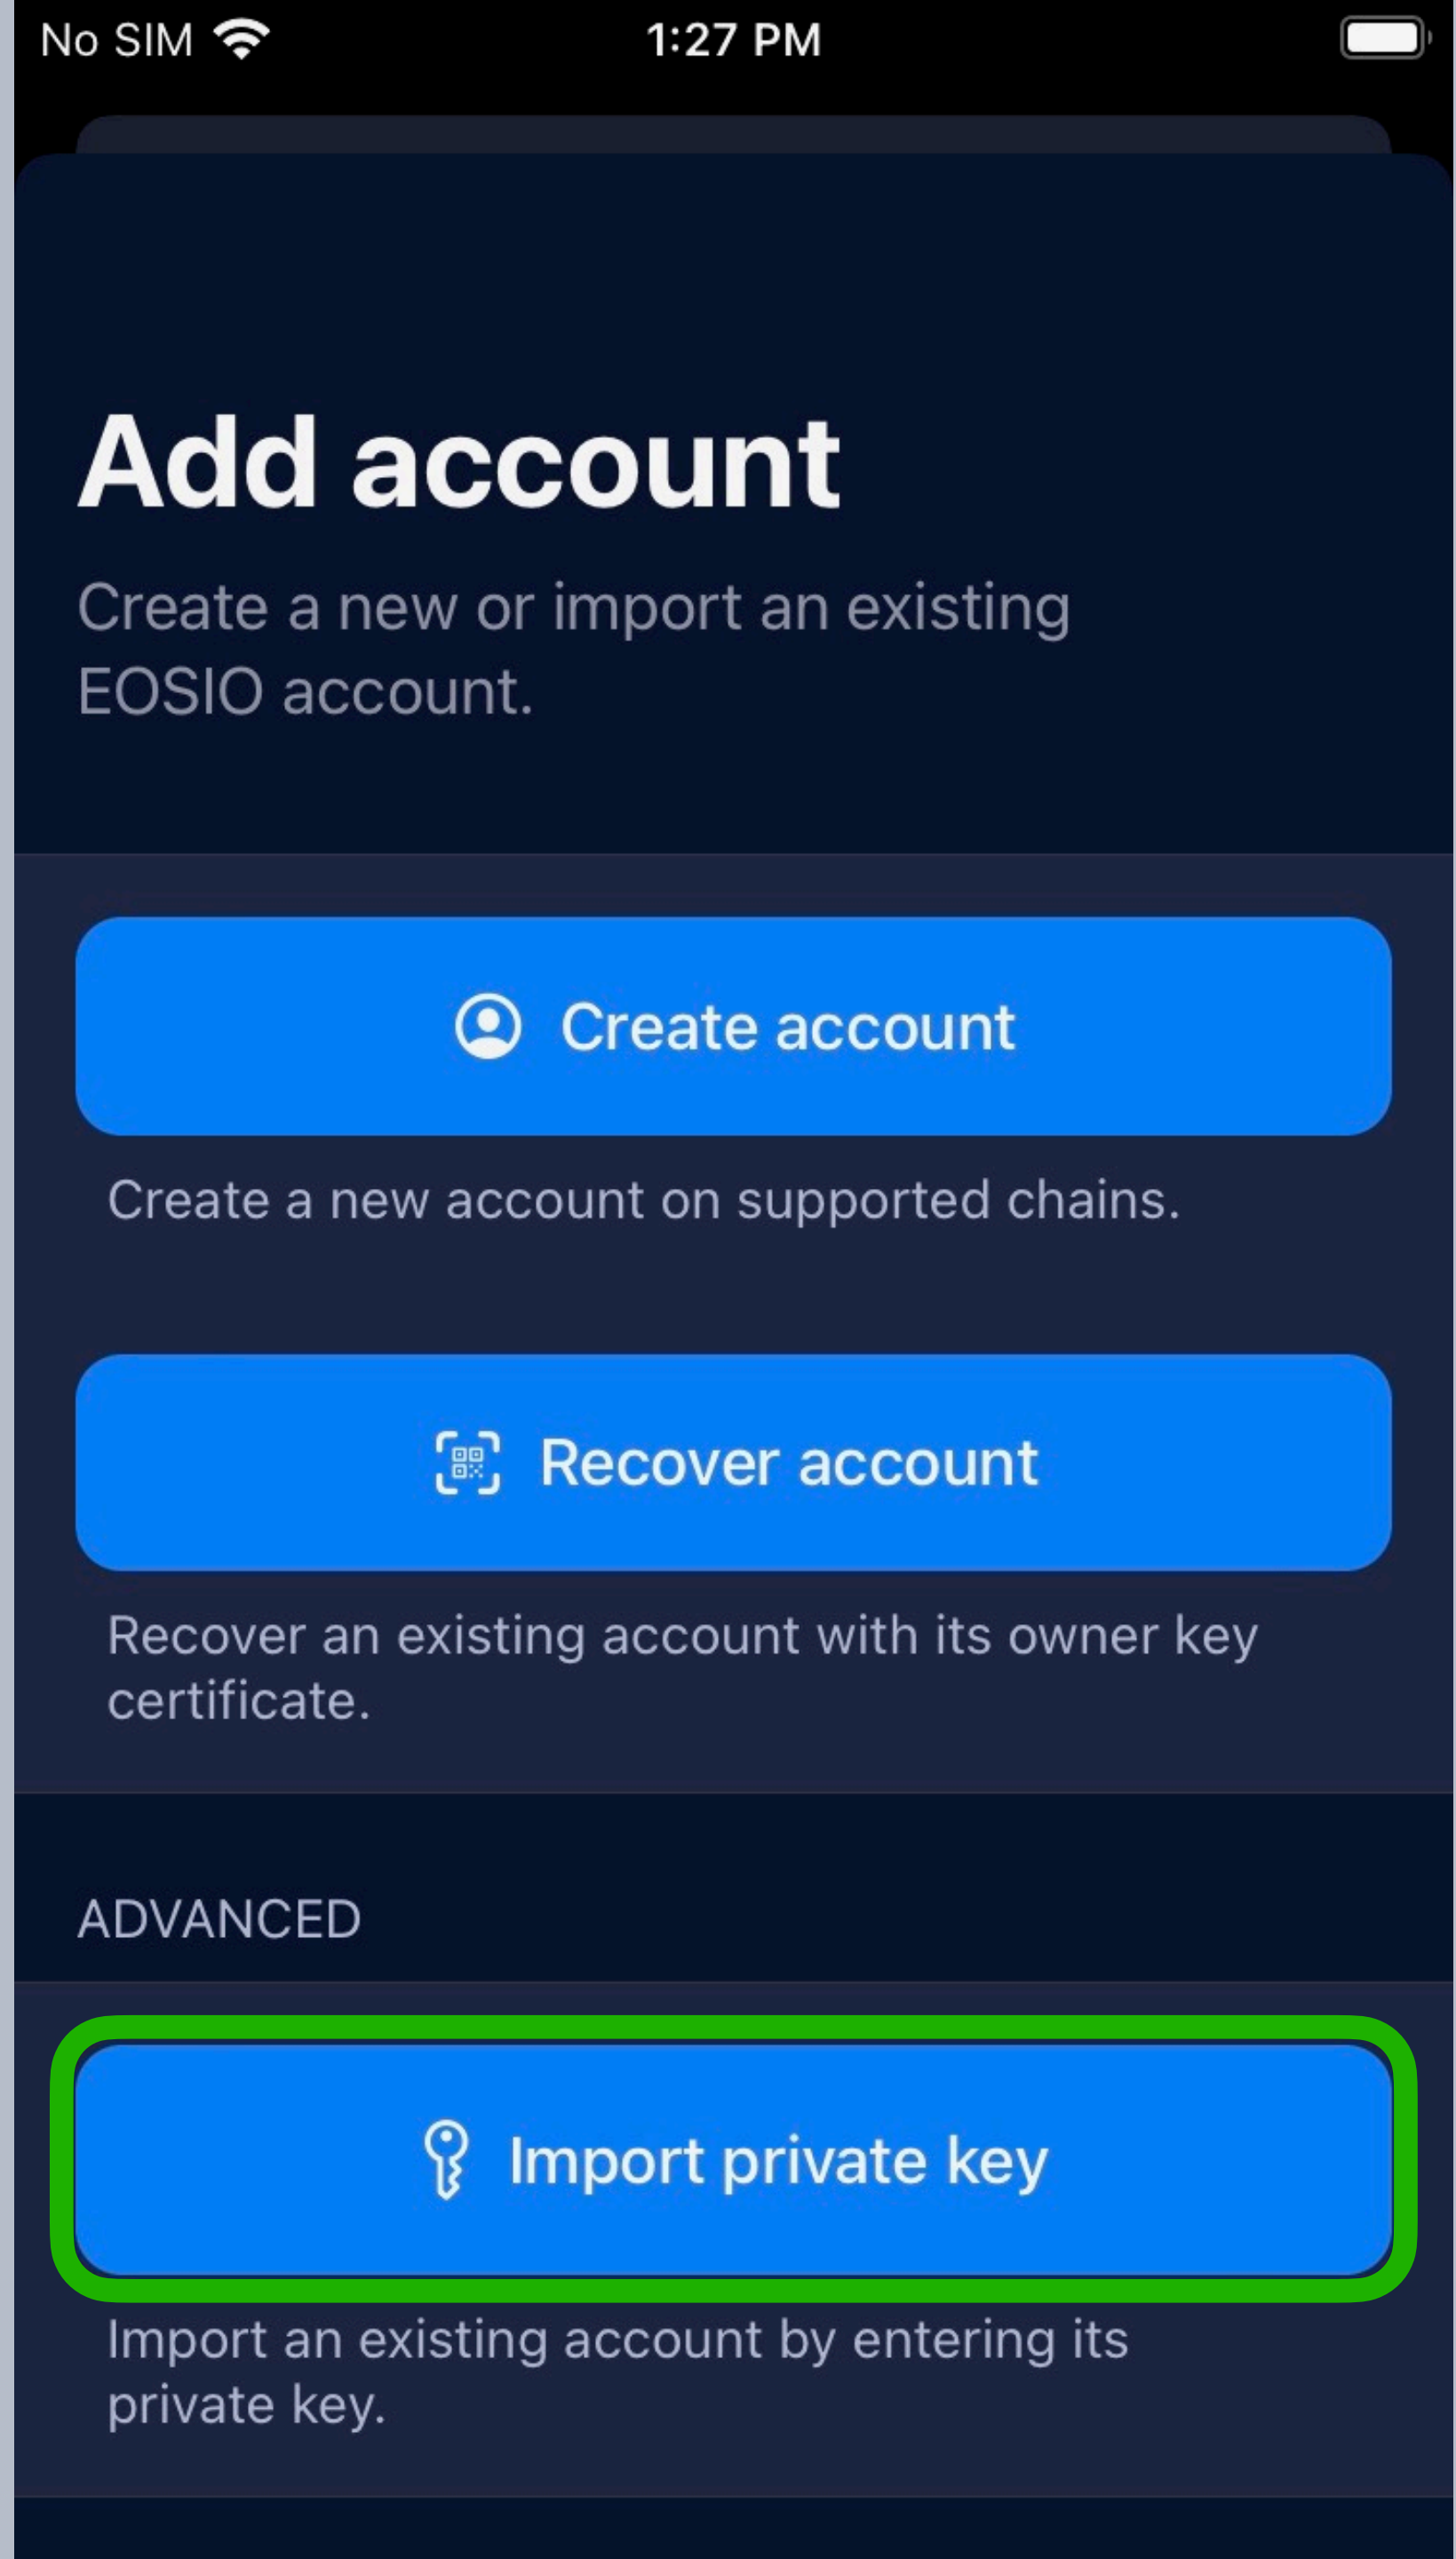

Add an account to get started.

Add account
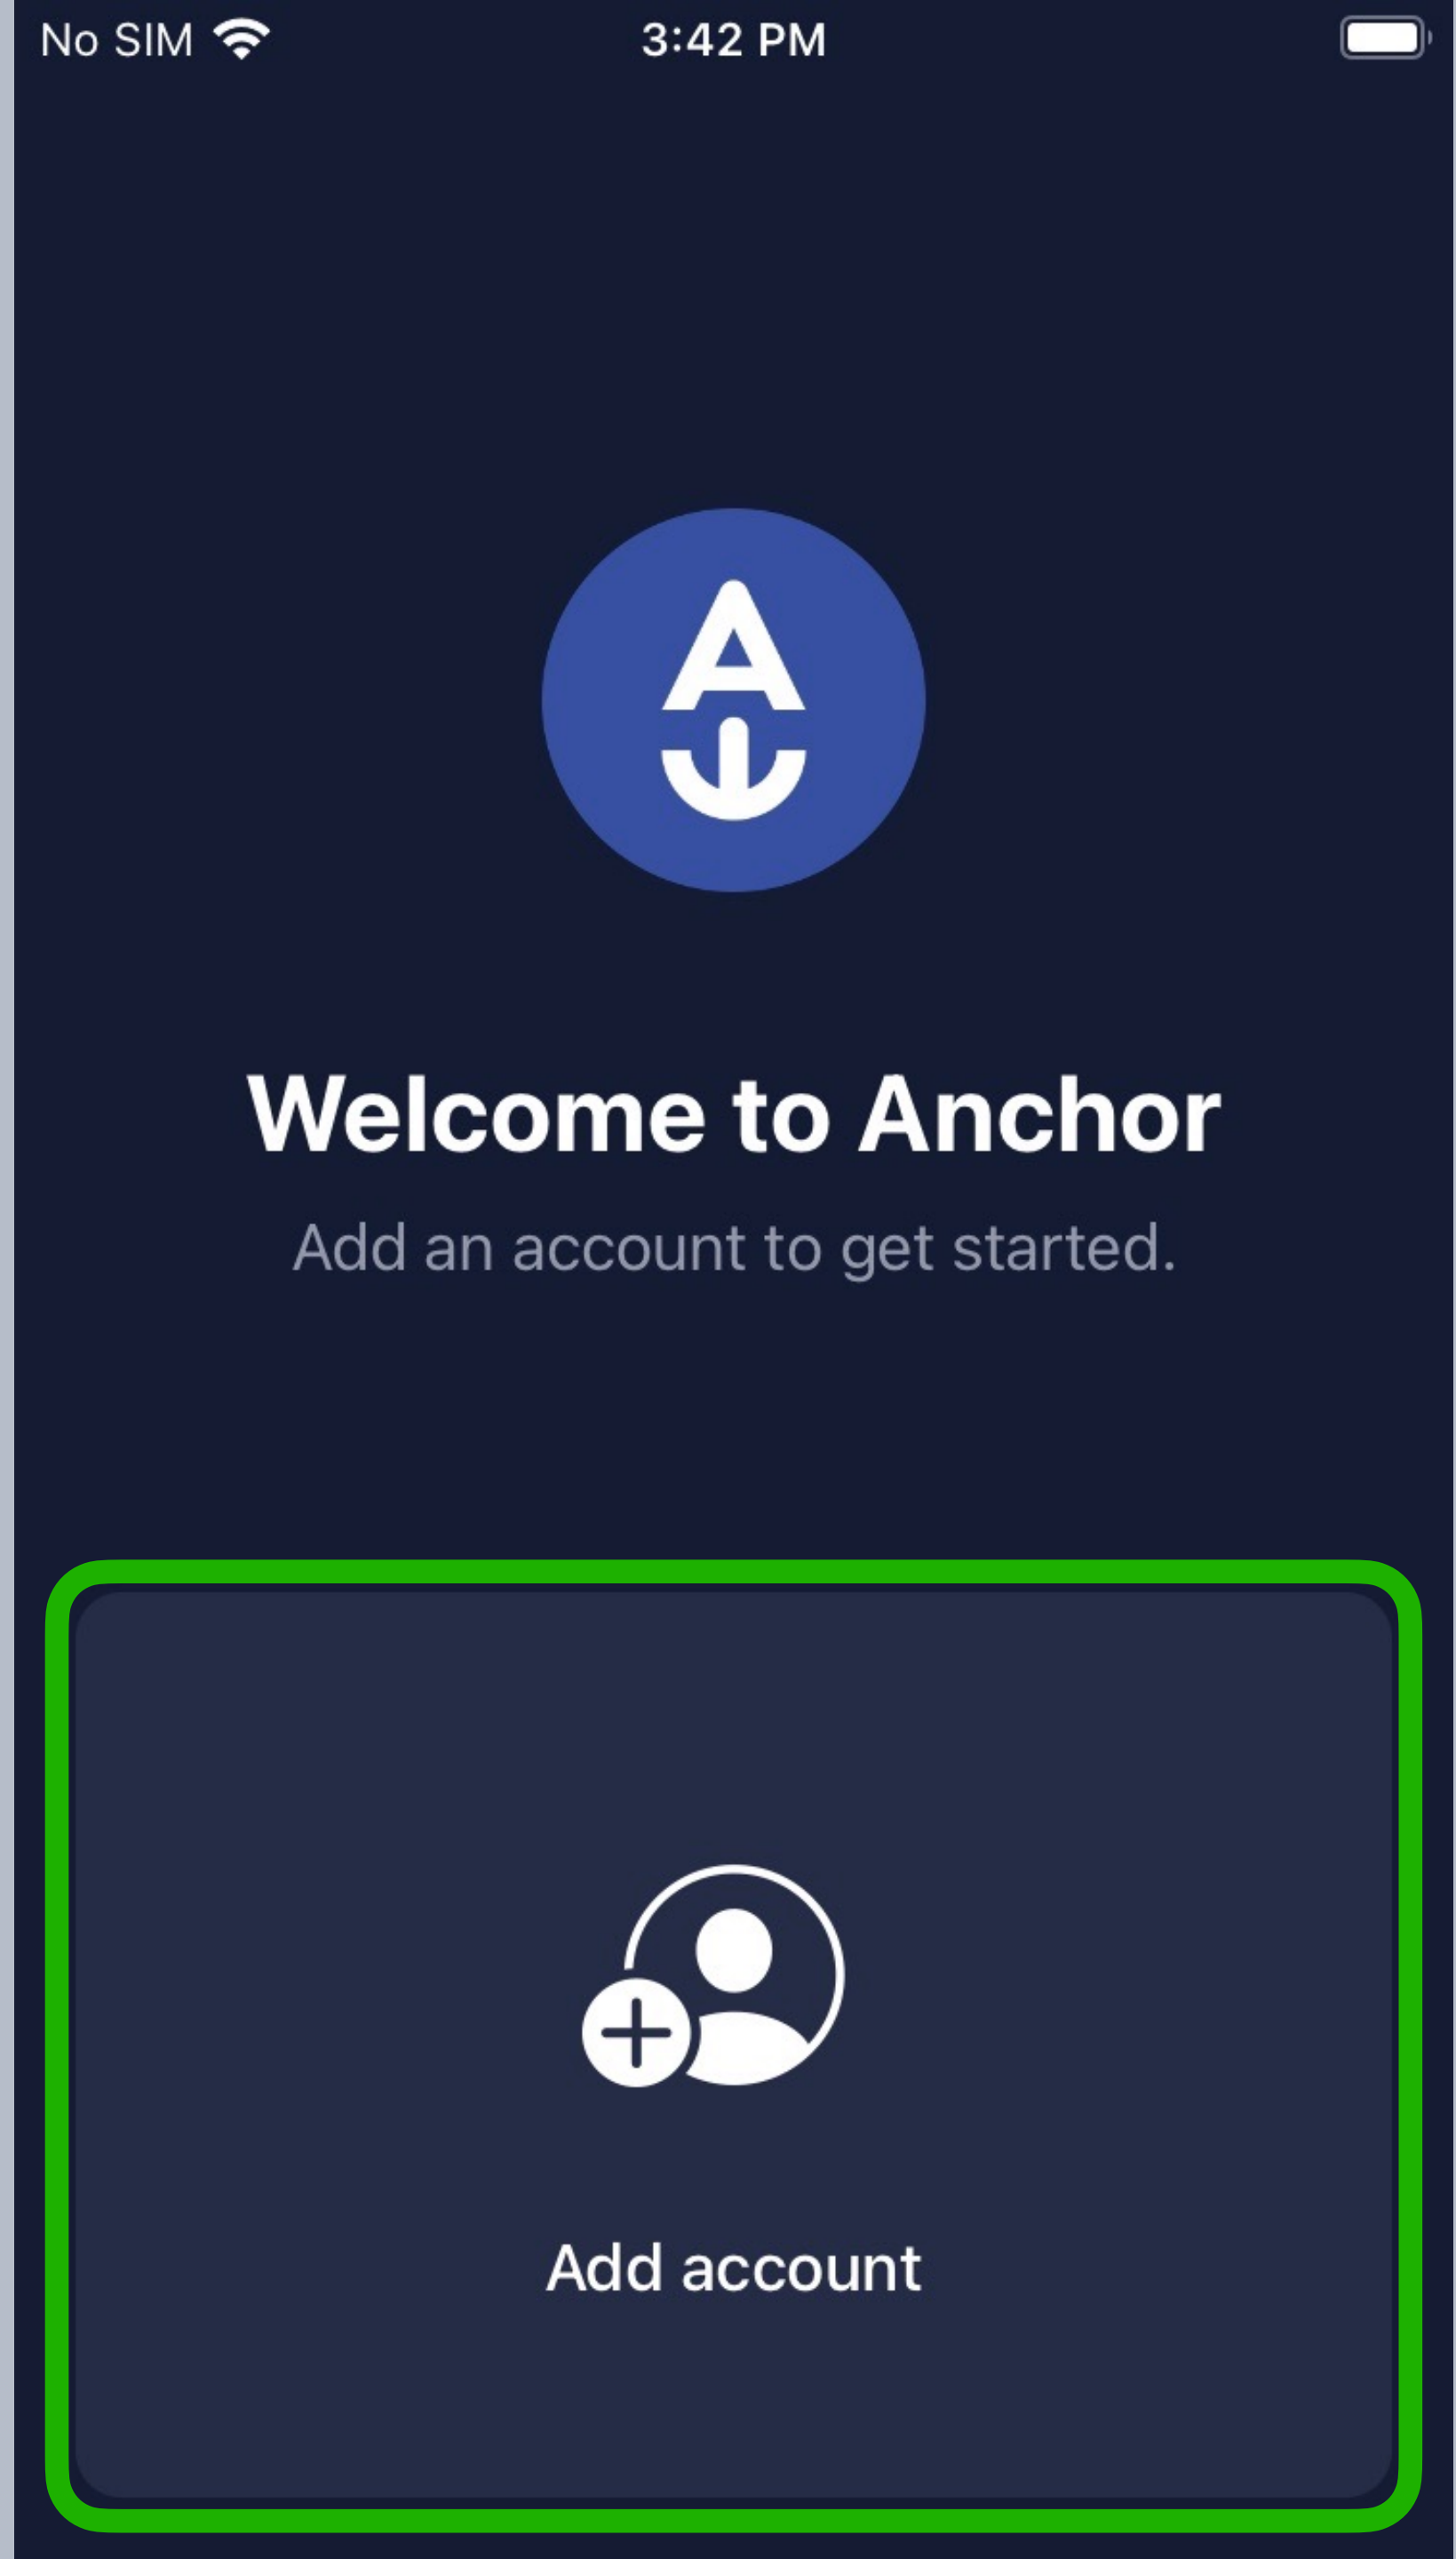

Step 2 - Import Account

In this walkthrough, we're going to be covering "Account Import" specifically.

For more information on "Account Recovery", see here.
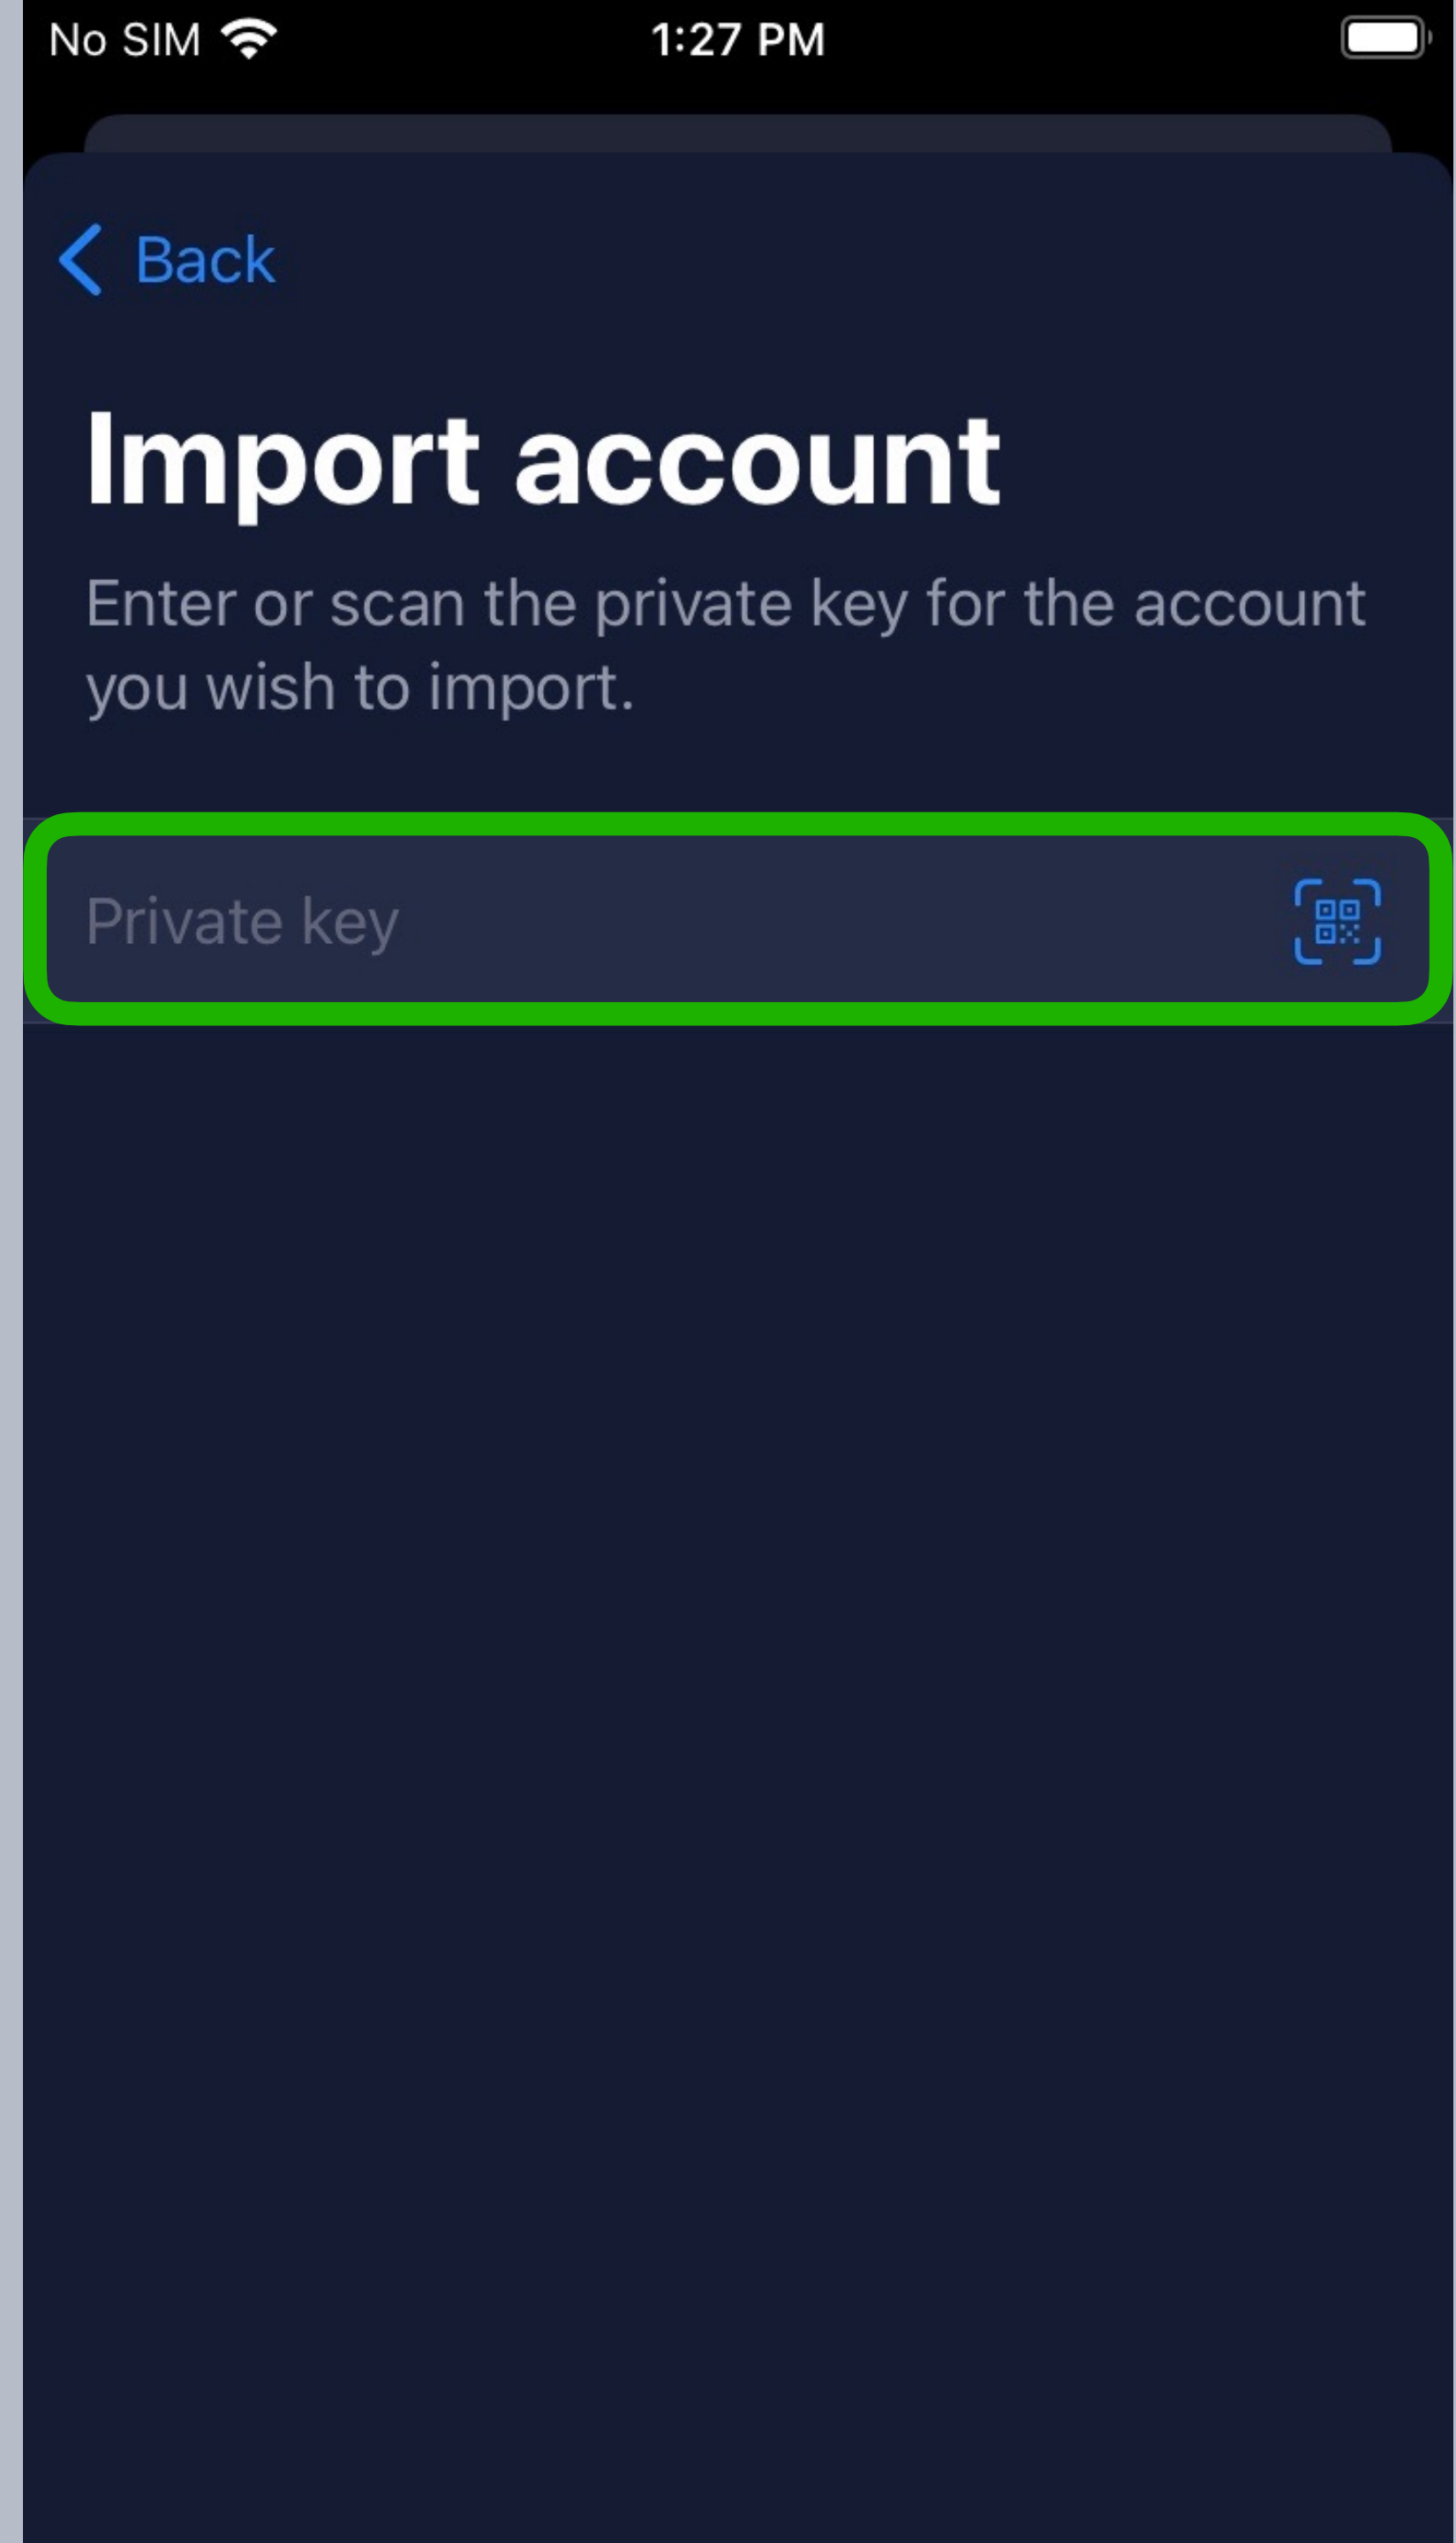

Select "Import Account"

No SIM

1:27 PM

Add account

Create a new or import an existing EOSIO account.

🔵 Create account

Create a new account on supported chains.

🔵 Recover account

Recover an existing account with its owner key certificate.

ADVANCED

🔑 Import private key

Import an existing account by entering its private key.

Import an account in Anchor

Step 3 - Enter Private Key

On this screen, you can enter your private key manually or you can scan the QR code version of your key as well.

Note: Within Anchor, this can be found in your account details.

Provide your preferred version of the private key and you will be moved to the next screen automatically

NOT FINDING YOUR ACCOUNT?

Manual import   >

Step 5 - Confirm Account Import

At this point, all that's left is to doublecheck your account details and verify your method of security.

If everything is all set, then select "Import Account"

Step 6 - Import Complete

Your import is complete!

As usual, please verify access and functionality after importing.

Upon completion, you'll be returned to the home screen
